

# WILLSTOP® 42

One-component, water-reactive, low-viscosity PU for soil stabilization

## Application and Properties

- Stabilization of non-binding soils
- Increasing the load-bearing capacity in the foundations.
- Very low viscosity
- Phthalate-free product
- Steerale reaction times by adding WILLADD® 42 (2% at 20°C) 40 ± 6s
- Easily mechanically degradable

## Packaging

Metal can  
10l (10 kg)

Metal can  
20l (20 kg)
